Re: Topsoil Conservation
Clinton Mine
ACT/049/006

Dear Mr. Hirschfeld,

Mr. Ron Daniels and I visited the Clinton Mine on January 17, 1979, as you were informed. We found that exploratory digging between the East and Lehi Cuts had progressed quite extensively. The Division must strongly urge you to have the topsoil from this area and all future pit sites stockpiled in designated areas. From our observations we found that the topsoil ranged from three (3) to twelve (12) inches in depth.

Enclosed is a copy of the office memo of our visit to the mine, which addresses the areas that concern the Division at the present time. Once the review is finalized you will receive a letter stating our official requirements.

Sincerely,

THOMAS J. SUCHOSKI
RECLAMATION HYDROLOGIST
